

DIANA M. FASCHING

TECHNOLOGY ANALYST

(913) 206-6949

dfasching@daleylegal.com

Diana works collaboratively with clients and their Legal, Information Technology, and Records Information Management personnel to distill and document complex technical systems and infrastructures. As a Technology Analyst with Daley & Fey LLP, Diana identifies issues and recommends practical solutions related to the management of electronically stored information using current and emerging technologies. Diana also works with firm counsel in assisting clients in understanding their obligations under and certifying compliance with the US/EU Safe Harbor for international data privacy protection.

Diana has extensive analytical and application development experience working in both the business and technical communities for over 14 years. The cross-functional roles gave her the necessary tools to communicate effectively with both the business and technical communities to ensure decision makers have sufficient and reliable information necessary to make sound judgments. Diana has successfully built long-term client relationships across diverse industries through in-depth inquiry, detailed research, thorough analysis, timely follow-up, and continuous project management.

Before joining Daley & Fey LLP, Diana was employed as a Senior Analyst for Redgrave Daley Ragan & Wagner LLP, where she consulted with clients on their Records & Information Management and e-Discovery initiatives. Diana has also worked in corporate settings, most recently at the Federal Reserve Bank of Minneapolis, where she was responsible for leading technology-related initiatives for the Treasury Services Call Centers.

Representative Work

- Assisted firm counsel in performing records management and discovery readiness gap analyses and developing remediation plans for a Fortune 100 entertainment company and a Fortune 1000 financial services company
- Collaborated closely with firm counsel and a Fortune 100 technology company in defining the current and future (recommended) state of their legal hold and collection processes and workflow
- Worked with firm counsel in developing discovery response plans, which included investigation and documentation of company-wide systems
